Welcome to the AZ SAFE Online System.

The purpose of this system is to accurately and thoroughly track school safety and disciplinary incidents that impact teaching and learning.

An **incident** is an event that occurs on school grounds, on the way to or from school, or at a school-sponsored event that disrupts the orderly functioning of schools and classrooms. Incidents range from criminal acts to minor problem behaviors and typically will result in referral for disciplinary assessment.

A **violation** is a crime or infringement of a law, policy, right, or expectation.

Incidents involve **people** ☐ one or more offenders and may also include victims, witnesses or bystanders.

An **offender** is an individual that commits a violation; can be a student or non-student and may or may not have a relationship with the school.

Incidents are also defined by location of occurrence and time of occurrence.
